

International Conference Chemistry and Technology of Functional Materials

Ivanovo, 7-10 December 2020

Dear Colleagues!

Ivanovo State University of Chemistry and Technology invites you to participate in the International Conference "Chemistry and Technology of Functional Materials", which will be held in 7-10 December 2020 in Ivanovo.

The conference aims to review the latest achievements and outline the prospects for obtaining and using new functional materials. Key reports will be made by leading scientists in the fields of organic, inorganic, organo-element and organo-phosphorus chemistry, metal complex catalysis, as well as in other areas of chemistry and technology of functional materials.

At Ivanovo State University of Chemistry and Technology the research in the field of chemistry, chemical technology and materials science are being conducted from the moment of its formation. Currently, scientists are particularly interested in obtaining new chemical compounds on the basis of which new materials with a number of useful properties have been obtained or can be obtained. These functional materials have found application in engineering, technology and medicine.

Conference proceedings

Conference proceedings will be published in a separate collection. The best reports will be recommended for publication in the journals [Molecules](#); [Izvestiya Vysshikh Uchebnykh Zavedenii. Series "Chemistry and Chemical Technology"](#) and ["Russian Chemical Journal"](#).

Abstract Design

A 1-page abstracts of the report are presented in Russian or in English according to the template on the conference website.

When considering the reports, priority will be given to those participants whose research is supported by the Russian Foundation for Basic Research (in the abstract you must specify a link to the RFBR grant number).
